

Summer Math Activities

Evoke mathematical thinking and stretch your brains this summer!

1. Continue to play ST Math at home using a computer or tablet.

ST Math® is a PreK-8 visual instructional program that leverages the brain's innate spatial-temporal reasoning ability to solve mathematical problems.

In ST Math, the puzzles start off simple and then get more challenging as the student progresses. Instead of giving students the answers, ask questions to help them figure it out on their own.

Check out resources, facilitating questions, and more at:
stmath.com/parent-math-resources

2. Take math outside!

Summer is a rich opportunity to bring mathematical thinking into these fun outdoor activities: bit.ly/summer-math

3. Take the Game-a-thon challenge.

Challenge your child(ren) to create a math game this summer and enter it in the K-12 Game-a-thon challenge.

Deadline: June 30, 2020
mindresearch.org/gameathon

Have a mathematical summer!
