Personalized Intervention Tool

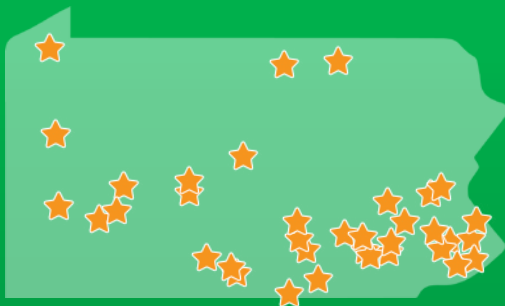

The ST Math visual learning technology provides a personalized path toward content mastery for all students. Designed to integrate with K-8 blended classroom instruction, ST Math engages students through the motivation of gameplay and helps them develop into persistent problem solvers and critical thinkers.

“ST Math and Jiji has become embedded in our schools, and teachers are seeing growth in all students. Students love ST Math so much we had to open our computer labs two times a week over the summer break.”

— Dr. Ryan Neuhard, Superintendent, Newport School District

ST Math serves 35 districts, 104 schools, 24,492 students in Pennsylvania.

Allentown City SD

Aligned to Academic Standards

STMath[®]

The Leader in Visual Learning

Research-Driven

Based on the latest research in neuroscience, cognitive science, mathematics and motivation.

Instant Informative Feedback

Animated visual representations show exactly why a solution works or doesn't work in real time.

Personalized

Data from built-in reports shows student learning needs to help teachers customize interventions.

Adaptive

Gently scaffolded, mastery-based games adapt to individual pace of learning.

Built-In Reports

Built-in RTI reports for daily or weekly viewing shows both class and student-level data.
