

ST Math

ASSESSMENT SUPPORT TOOL

Data driven instruction
based on assessment scores

Save teachers from the guesswork of assigning intervention content that students need most! Use the ST Math: Assessment Support Tool to put your math assessment scores to work!

ST Math® visual instructional program coupled with the Assessment Support Tool provides data driven instruction based on assessment scores. High-quality ST Math intervention content is auto-assigned to students in grades 2-8 based on their assessment scores from NWEA® MAP® Growth, Renaissance Star Math, or other assessment providers.

Give students who need it most the foundational support to successfully progress on their journey.

With the ST Math: Assessment Support Tool, administrators and educators can have confidence that the assessment scores will be put into action.

SUPPORT STUDENTS AT THEIR GRADE LEVEL

Ramp students into their grade-level content and continue their journey with confidence in learning the content that will be on their next assessment.

LEVERAGE ASSESSMENT DATA

Use NWEA® (MAP® Growth™), Renaissance Star Math, or other assessment providers scores to auto-assign intervention content to students who need it most.

EMPOWER TEACHERS

Intervention content is auto-assigned, so teachers can spend more time on impactful activities like facilitation. Teachers also have confidence that the student will work on what's assigned in the correct order and efficiently progress.
