

The award-winning ST Math® software program coupled with resources, lesson plans and an instructional framework, combine to create a powerful solution for learning recovery.

Use ST Math Immersion as an intensive program for extending the year, as a school year jumpstart, or as a summer program.

- **Grades K-5**
- **All curriculum materials for:**
 - **90-minute math blocks**
 - **5 days a week for 5 weeks**

MIND's team of experts can provide planning support to help meet other time structures. (4-6 weeks and/or 60-120 minutes)

ST Math Immersion is a non-traditional program that provides students with a rich mathematical environment. The curriculum is designed for learning recovery, addressing common areas students struggle in, and providing opportunities for building their content knowledge, reasoning skills, and growth mindset. Content in grades K-2 is focused on operations and algebraic thinking. Content in grades 3-5 is focused on fractions.

The instructional resources include pre- and post-assessments, rotation stations through ST Math's visual models and manipulatives, number sense games, small group instruction, a project using engineering design principles, and whole-group lessons.

The program costs \$7,000 per site and includes professional learning.

FOR STUDENTS

Quality Learning Experience

- Access rigorous mathematics
- Build deep conceptual understanding
- Develop confidence and growth mindset

FOR TEACHERS

Curriculum Embedded Professional Development

- Deepen content knowledge
- Develop instructional strategies for use all year long
- Grow as a facilitator and blended learning instructor

FOR EVERYONE

Build Your Community's Relationship with Math

- Learning Showcase invites families, students and the community to celebrate math
- Students communicate their learning and thought process
